---

## SUMMARY

Current student with a big passion for Software Engineering. I am interested in Software Engineering because of the potential that it lets you fulfill. I am able to construct solutions with my own knowledge and experience to solve a problem, and that is why I have a passion for Software Engineering.

## SKILLS

Ruby, Ruby on Rails, JavaScript, React, Python, C++, JSX, HTML, Programming, Software Development, Backend, Frontend, SQL, CSS, Linux, MySQL

## TECHNICAL PROJECTS

### **Game Review, [Github](#)**

This App allows users to post reviews on video games

- Utilized ruby gems to locally store encrypted user credentials
- Engineered an efficient Rails framework to display and process data
- Reassessed and modified code to efficient and clean for reviewers

### **Rocket Science, [Github](#)**

Users were able to use a ‘inefficient’ rocket fuel calculator

- Used React and Redux to create a clean and efficient flow of code
- Made a Rails API to which user data could be stored
- Utilized Client-Side routing to maximize speed when on web application

### **Weather Reader, [Github](#)**

Using an API users can input a zip code to get the current weather in that area

- Applied Ruby gems to parse API to more readable data for the user
- Developed class-based code for separation of concerns and clean code
- CLI based program for ease of user experience

## EXPERIENCE

### **Raymond Pharmacy, Raymond AB – Clerk**

August 2019 – January 2020

- Learned to communicate well with customers to guarantee resolved problems
- Worked with management and team members to coordinate an efficient daily routine
- 

## EDUCATION

### **Flatiron School, Online – Software Engineering**

July 2020 – January 2021

Full Stack Web Development, Ruby on Rails and JavaScript Program

### **BYU-I, Rexburg ID – Computer Engineering**

January 2020 – Present

Bachelors of Science, Computer Engineering
